

## **Volante Announces SWIFT SRG 2009 And SWIFTNet FIN Integration Solutions**

**Volante solutions for SWIFT messages include pre-built MT-MX coexistence, plus support for SEPA and other payments standards**

NEW YORK, March 16, 2009 – Powering finance with data management innovations, Volante Technologies, Inc. today announced the availability of comprehensive SWIFT integration solutions addressing the latest SWIFT Standards Release Guide (SRG) 2009 and SWIFTNet FIN updates. Available as plug-ins to Volante integration tools, these include fully functional versions of the ISO 20022 and ISO 15022 data dictionaries for MT-MX message coexistence, the complete catalog of all SWIFT messages and all SWIFT business rules specified in SRG 2009. All solutions offer backward compatibility for previous SWIFT releases, enabling migration to SRG 2009 with minimal time and effort.

“Because we launch our updates so early in the year, Volante customers gain more time to test and deploy SRG 2009 solutions before SWIFT requires them to go live,” said Vijay Oddiraju, CEO. “This is one more reason that Volante users are leaders in SWIFT-related projects. Our innovative approach to integration automation allows them to focus on the business logic of their development initiatives, rather than wasting time and money on complex integration tasks.”

With the new SRG 2009 updates, Volante enables rapid development of enhanced transaction processing and integration of SWIFT messaging into new business domains. The solutions incorporate pre-built and pre-tested coverage of the entire catalog of SWIFT message, including out-of-the-box support for coexistence between FIN standards and MX standards for Funds, Credit Reporting and Cash Management. Volante also supports SEPA, and other standard formats such as BAI2, EDI, ISO8583, ACH, FIX and vendor data formats.

Volante is infrastructure agnostic. SWIFT messaging solutions developed using Volante can be seamlessly integrated into a customer’s existing middleware, such as J2EE application servers, message brokers or existing applications.

### **About Volante**

The first SWIFT vendor partner to win the SWIFT Messaging Data Services designation, Volante Technologies has been accelerating data management for the financial services industry since 2001. Volante provides integration solutions for low-latency environments, service oriented-architectures, vendor data consolidation, event processing, SWIFT message integration and other complex data challenges. Its metadata-based technology also enables data governance and model-driven data initiatives.

Volante solutions are employed by buy-side and sell-side institutions around the globe, corporate treasuries, financial industry utilities and exchanges, including Brown Brothers Harriman, The Municipal Securities Rulemaking Board, and Broadridge.
