

Volante Introduces Sensible New Pricing for Enterprise Data Integration and Oversight

New Pricing Slashes Upfront Costs for Efficiency, Control and Productivity Benefits of Standardized Connectivity Across the Enterprise

NEW YORK, NY, June 23, 2009 – Volante Technologies, provider of tools for accelerated data management, today announced a new enterprise pricing model for Volante tools for integration, data management and data governance. In addition to perpetual licenses, Volante enterprise tools are now available by annual subscription incorporating all maintenance and upgrades. The result is dramatically reduced upfront costs for financial institutions seeking a comprehensive, unified approach to high-speed integration of incoming data, as well as standard connectivity across the enterprise.

The announcement was made at the SIFMA Technology Management Conference being held at the New York Hilton, June 23-25. At Booth 1603, Volante is briefing attendees on the new pricing as well as demonstrating Volante solutions for low-latency, SWIFT integration and enterprise data management.

Volante's sensible new pricing places enterprise-level data control within reach of more institutions. Enterprise users can eliminate time and labor from front, middle and back-office development projects, while accommodating tight budget restrictions. Volante tools also capture and manage the live metadata from active integrations.

"Enterprise Volante tools offer the most advanced technology available today for eliminating all the pain from data integration, while opening up a new world of data governance, data research and strategic development projects," said Vijay Oddiraju. "There is a huge demand today for a single integration solution to serve both low-latency and downstream data movement, and Volante easily addresses all these challenges. With our new sensible pricing, full ROI arrives even faster."

Based on proven innovations in data movement technology developed by Volante, the new enhancements include latency measurement and an expanding list of plug-ins for vendor feeds, financial data formats and middleware platforms. Volante tools have the flexibility required for enterprise-wide usage. Volante works with any configuration of network, application and platform environments. Its efficient use of

active application memory and existing hardware virtually eliminates impact on the system resources.

About Volante

Volante Technologies has been accelerating data management for the financial services industry since 2001. Volante provides integration and data management solutions for low-latency environments, service oriented-architectures, vendor data consolidation, event processing, SWIFT message integration and other complex data challenges. Its metadata-based technology also enables data governance and model-driven data initiatives. Volante solutions are employed by buy-side and sell-side institutions around the globe, corporate treasuries, financial industry utilities and exchanges, including Brown Brothers Harriman, The Municipal Securities Rulemaking Board, and Broadridge. Volante holds the 2009 SWIFT Messaging Data Services designation. For more information, visit www.volantetech.com.
